

Company

Mekha Technology Co., Ltd. is currently looking for a team member as a Cloud Infrastructure Consultant. The position will be based in Bangkok, Thailand.

Job Title: Cloud Infrastructure Consultant**Job Summary:**

Cloud Infrastructure Consultant role provides advanced technical services in Cloud Services, Microsoft Azure focus. This position is the primary technical lead overseeing cloud environment on the migration to, utilization, health and performance of the platform; also, contributing in landing zone architecture designs and configurations, and providing support to admins working in the system hosted within. Hence, we are looking for individual who possesses technical skills and experiences in the operation and administration of cloud-based infrastructures and services, and is able to work well with diverse roles from business as well as IT leads, application developers to architects.

Job Responsibilities:

- Serves as Mekha Tech's expert on the cloud-based infrastructure services
- Provides consultation and expertise to customers in the selection of features and integration of cloud services
- Designs and configures landing zone and computes systems based on Microsoft Azure platform
- Installs, configures, administers, manages, supports and documents Azure compute instances and services including, Azure Backup, Azure Storage Monitor, snapshot, Azure Storage, VNet, Load Balancers and RBAC for optimum cost, performance, and security
- Provides advanced technical support for critical server environments including server deployment, migrations, upgrades, patch management, application support, virus remediation, E-discovery events, business continuity, operational and disaster recovery
- Closely follows and learns from evolution of MS Azure capabilities and services (also Amazon Web Services and Google Cloud Platform)
- Is responsible and accountable for the delivery, operation and quality of our services

Qualifications and Skills:

- Minimum 3 years of professional experience in one or more of the following IT disciplines: Azure administration, Infrastructure as a Service (IaaS) management, Database Management, Network administration and Server management
- Expert level experience consulting, cloud-infrastructure designing, programming, maintenance and/or supporting work for moderate or large size organizations
- Strong organizational & multi-tasking skills
- Strong analytical skills and thought processes
- Technical and organizational leadership skills

A plus:

- Knowledge on cloud infrastructure offerings from the multiple providers
- Knowledge in cloud-based security
- Certified in all or any of the followings:
 - o Microsoft Certified Azure Fundamentals AZ-900
 - o Microsoft Azure Administrator AZ-103
 - o Microsoft Azure Solutions Architect AZ-301
